GotSafety Unveils Online and On Site Business Safety Solutions

GotSafety Launches Comprehensive Safety Solutions for Businesses with Easy Online Access and On-Site Training Options

GotSafety, a leading provider of workplace safety solutions, is offering businesses an integrated safety platform designed to streamline employee training, compliance, and hazard management. From online resources and mobile apps to on-site inspections and specialized certifications, GotSafety aims to help companies maintain OSHA compliance while improving overall workplace safety.

Free Access for HISIG Members

GotSafety is **completely free for HISIG members**, giving them full access to the client center, mobile app, and extensive online training resources. This benefit allows HISIG members to manage employee safety, training, and compliance efficiently without any subscription cost, while also offering discounted upgrades for additional on-site services.

Simple Registration and Pre-Negotiated Service Discounts

Businesses can easily register for GotSafety services by visiting their website and filling out a simple form. The platform also provides pre negotiated discounts on upgraded service packages, making it easier for small and medium-sized companies to access comprehensive safety solutions at affordable rates.

Online Resources with Extensive Safety Training Content

GotSafety's online resources include the **GotSafety Lite Premium Access**, which features over 1,000 safety video topics available in both English and Spanish. Users can request new or customized lesson topics and access the content via mobile app, website, or stream through Roku.

Key offerings include:

- One-time on-site safety evaluations (free with any service upgrade within 30 days)
- Cal/OSHA citation defense and consultation*
- OSHA citation defense consultation available nationwide**
- Phone consultations during business hours

*Services available only in California
**Services available in all states outside California

Client Admin Dashboard for Complete Oversight

GotSafety provides a **Client Admin Dashboard** that allows businesses to manage employee training, track progress, and maintain documentation. Features include:

- Uploading, activating, and deactivating employees
- Managing training schedules and lesson approvals
- Creating custom playlists for departments or new hires
- Sending reminders and tracking training records by name, date, topic, location, or department
- Uploading and managing company documents such as Safety Data Sheets and PDFs
- Creating custom forms that can be filled out on a PC or mobile device

The dashboard also includes a **My Learning Module** to upload and track all company training, as well as statistics to monitor compliance and identify gaps.

Employee Client Center: PC and Mobile App Access

Employees can access safety content and company documentation through the **Employee Client Center**, available on both PC and mobile devices. Key features include:

- Offline access to documentation, training, and forms for areas without mobile service
- Over 1,900 safety topics in English and Spanish, including video and audio options
- Digital sign-off for completed training
- Viewing of OSHA documentation (if purchased)
- Ability to fill out and submit forms via smart devices or PC

GotSafety also offers live technical support and easy-to-follow video tutorials to ensure users can navigate the system effectively. Full access to the client center and mobile app is available for **$69.99 per month**.

On-Site Safety Inspections and Training (California Only)

GotSafety provides **comprehensive on-site inspections** performed by experienced safety professionals. These inspections cover:

- Facility walk-through and review of safety programs
- Review of training programs
- On-the-spot consultation to abate hazards and improve operations
- Identification of OSHA violations, possible hazards, and machine-guarding risks
- Summary evaluation reports, including photos and instructions for hazard correction

Additionally, GotSafety offers **on-site bilingual safety training**, with sessions led by certified instructors. Each visit can include up to two back-to-back lessons, with additional sessions available for $75 each. Training covers a wide range of safety topics, including forklift operation, cherry pickers, scissor lifts, boom lifts, respirator training, and more.

Forklift Safety Training and Guidelines

Forklift safety is a critical focus for GotSafety. Forklifts, jitneys, hi-los, and lift trucks are industrial vehicles used to move heavy machinery, crates, and boxes within facilities. Key safety guidelines include:

- Inspecting forklifts at the start of each shift
- Checking tires, brakes, steering, lift system, cooling system, and fuel systems
- Reporting mechanical problems and removing defective units from service

- Allowing only trained mechanics to perform repairs
- Training operators to safely add fluids or refuel propane-powered forklifts

Risk Assessment and Safety Documentation

GotSafety provides comprehensive documentation services to ensure regulatory compliance across 50 states. Businesses can access:

- Injury and Illness Prevention Programs (IIPP)
- Emergency Action Plans
- Accident/Incident Investigations
- Fire Protection and Prevention Plans
- Hazard Communication and Personal Protective Equipment Guidelines
- Powered Industrial Truck, Fall Protection, Scaffold Safety, and more

All documentation is **customized for the company and industry**, addressing equipment types, potential hazards, and procedures to prevent injuries. Businesses can access and update documentation through the online platform and mobile app. The service is available for **$1,500**.

Additional on-site visits can be purchased for $335 each. Full access to the **GotSafety client center and mobile app** is available for **$59.99 per month** with any on-site service plan purchase.

Specialized Certifications and Training

GotSafety also offers **on-site certifications** for:

- Forklift operators
- Cherry pickers, scissor lifts, and boom lifts
- Respirator fit testing and training
- Forklift Train-the-Trainer programs
- Other specialized training (California only – call for pricing)

For businesses looking to improve safety, maintain compliance, and track employee training efficiently, GotSafety provides a comprehensive, user-friendly platform combining digital solutions with on-site expertise.
