

The Marijuana Fraud Podcast

You have questions, so where do you go? Pro marijuana people will have you believe there are no cons. Anti marijuana people will tell you that there are no pros. They are both lying. It is a fraud that is perpetuated every day in America and the citizens of this country are the losers every time they pass another junk law based off of these lies. The Marijuana Fraud Podcast is hosted by Michael Boutin, someone who has serious credibility in this space since 1977. You may have seen Mike on Discovery Channels “Weed Country”? A Hollywood caricature of marijuana, the people who grow, sell, use and enforce against it. A Christian conservative who believes in God and marijuana; and experience that goes back before today's CBD and “legalization” schemes. Mike has been a grower, seller, smuggler, advocate, political consultant and federal prisoner who has seen the topic from every angle. Every legalization scheme today is full of things that are not true, and there is no one to judge balls and strikes. The merchants and pro marijuana people will not and neither will the forces who won't let prohibition go. Where does that leave you? Confused if you are like most people who have no experience with marijuana or the people who use it. You deserve to know the truth about marijuana and its history if they are going to “legalize” in your neck of the woods. The Marijuana Fraud Podcast is your anti fraud source for everything factual about marijuana going back to antiquity.
